Chapter 1 Circular Economy for Energy Materials—State-of-the-Art Initiatives and Regulatory Issues 1

Harjit Kaur and Nidhi Singhal

1.1	Introduction to Circular Economy and Energy Materials	1
1.1.1	Definition, Principles and Implementation Strategies	3
1.1.2	Principles of Circular Economy	5
1.1.3	Circular Economy Processes or Strategies	8
1.1.4	Evolution and Global Adoption of Circular Economy Concepts	9
1.1.5	Circular Economy in Various Industries	10
1.2	The Energy Sector and Its Environmental Impact	11
1.2.1	Overview of the Energy Sector	11
1.2.2	Environmental Challenges and Sustainability Issues	12
1.2.3	Role of Circular Economy in Addressing Energy Sector Challenges	12
1.3	Importance of Circular Economy in the Energy Sector	13
1.3.1	Resource Scarcity and Energy Security	13
1.3.2	Reducing Environmental Footprint and Emissions ...	13
1.3.3	Transition to a Sustainable and Resilient Energy System	14
1.4	Circular Economy Approaches in the Energy Sector	15
1.4.1	Energy Material Efficiency and Optimization	15
1.4.2	Renewable Energy and Circular Systems	15
1.4.3	Energy Storage and Circular Solutions	16
1.4.4	Circular Economy in Fossil Fuel Industries	16
1.5	Circular Economy and the Energy Transition	17
1.5.1	Role of Circular Economy in the Shift to Clean Energy	18
1.5.2	Circular Economy and Decentralized Energy Systems	18
1.5.3	Circular Economy and Circular Cities	19
1.6	Barriers and Challenges in Implementing Circular Economy in the Energy Sector	19
1.6.1	Technological and Infrastructural Challenges	19
1.6.2	Policy and Regulatory Barriers	20

1.6.3	Financial and Economic Implications.....	20
1.6.4	Stakeholder Engagement and Collaboration Challenges	21
1.7	Conclusion	21

Chapter 2 Circular Economy: An Industrial Perspective for Sustainable Future..... 25

*Amandeep Kaur, Sandeep Singh, Niraj Bala, Surinder Singh,
and Sushil Kumar Kansal*

2.1	Concept of Circular Economy	25
2.2	Difference between Linear Economy and Circular Economy	27
2.3	Relationship between Circular Economy and Sustainable Development	30
2.4	Principles for a Sustainable Circular Economy.....	34
2.4.1	Concurrent Efforts to Sustain the Economy to Raise Living Amenities under Environmental Constraints	34
2.4.2	Equity between Generations	35
2.4.3	An Integrated Viewpoint: Environmental, Economic, and Human Systems Connecting the Local and International Platforms.....	36
2.4.4	A Change in Social Principles Is Required to Maintain Equilibrium between Economy and Environment	36
2.4.5	Utilizing Resources Sustainably, Leaving the Linear Economy, and Instead Developing a “Resource Flowing Society”	36
2.4.6	Sustainable Assets, or the Sum of Human-Made and Environmental Capital, Does Not Deteriorate with Time	37
2.4.7	Cooperative Change	37
2.4.8	Execution Is Context Dependent	38
2.5	Circular Economy as a Promoter of Sustainable Development in Business Management.....	38
2.5.1	Strategic Planning (SP)	39
2.5.2	Cost Management (CM)	40
2.5.3	Circular Supply Chain Management (CSCM)	40
2.5.4	Quality Management (QM)	41
2.5.5	Environmental Management (EM)	41
2.5.6	Process Management (PM)	42
2.5.7	Logistics and Reverse Logistics (L&RL).....	42
2.5.8	Service Management (SM).....	43
2.5.9	Research and Development (R&D)	44
2.6	Conclusions.....	44

Chapter 3	Lithium as New Gold for Advanced Energy Material, Availability in Nature, Recovery from Waste, and Sustainability.....	51
------------------	--	----

Majeti Narasimha Vara Prasad and Chanchal Kumar Mitra

3.1	Introduction	51
3.2	Circular Economy.....	52
3.3	Energy as a Material Resource.....	54
3.4	Costs Associated with Energy Production	54
3.5	Lithium in Energy Storage	56
3.6	Lithium Battery	56
3.6.1	How Does a Typical Battery Work?.....	56
3.6.2	Why Lithium?.....	58
3.7	Where the Lithium Comes From.....	60
3.7.1	Lithium and Health	66
3.7.2	Lithium Production	68
3.8	Lithium Recycling	69
3.9	Conclusions and Other Considerations.....	70

Chapter 4	Photocatalytic Materials for Production of Hydrogen from Water Using Solar Energy.....	77
------------------	--	----

Nandana Chakinala, Praveen K. Surolia, Raksh Vir Jasra, and Anand G. Chakinala

4.1	Introduction	77
4.2	Fundamental and Thermodynamic Aspects.....	78
4.3	Performance Measurement of an Efficient Photocatalyst	80
4.4	Photocatalytic Water-Splitting Methods	80
4.4.1	Heterogeneous Photocatalytic Water Splitting.....	81
4.4.2	Homogeneous Photocatalysis	86
4.4.3	Hybrid Photocatalysis.....	86
4.5	Strategies for the Modification of Photocatalysts.....	87
4.5.1	Doping of Metals and Non-Metals.....	87
4.5.2	Semiconductor Composite Formation.....	88
4.5.3	Introduction of Porosity.....	89
4.5.4	Controlled Size and Shape Synthesis	89
4.5.5	Defect Engineering.....	89
4.5.6	Bionic Engineering.....	90
4.5.7	Sensitization of Semiconductor	90
4.6	Challenges of Photocatalytic Water Splitting.....	90
4.6.1	Energy Losses, Low Quantum Efficiency.....	90
4.6.2	Product Separation	91
4.6.3	Mass Transfer Limitations	91
4.6.4	Utilizing Incident Photon Energy Efficiently.....	91
4.6.5	Minimizing the Use of Sacrificial Reagents	92

4.6.6	Addressing Fresh Water Availability	92
4.6.7	Reactor Configurations.....	92
4.7	Integrating Circular Economy Principles in Photocatalytic Water Splitting.....	93
4.8	Future Outlook	94

Chapter 5 Valorization of Lignocellulosic Biomass into High-Value Chemicals: Forging a Route towards the Circular Economy..... 98

Mangat Singh, Sahil Kumar, Hadi Ali, Surinder Singh, and Sushil Kumar Kansal

5.1	Introduction	98
5.1.1	Structure of Plant Cell Wall	100
5.2	Composition of Lignocellulosic Biomass	100
5.2.1	Cellulose	100
5.2.2	Hemicellulose	102
5.2.3	Lignin	103
5.2.4	Extractives	105
5.2.5	Ash and Minerals	106
5.3	Valorization of Lignocellulosic Biomass.....	107
5.3.1	Pre-Treatment of Biomass	107
5.4	Platform Chemicals from Biomass.....	108
5.4.1	Furfural	108
5.4.2	Hydroxymethylfurfural	109
5.4.3	Glycerol	110
5.4.4	2,5-Furandicarboxylic Acid	111
5.4.5	Lactic Acid	112
5.4.6	Succinic Acid	113
5.4.7	Levulinic Acid.....	113
5.4.8	3-Hydroxypropionic Acid.....	114
5.4.9	Sorbitol	115
5.4.10	Xylitol	116
5.4.11	Itaconic Acid	118
5.5	Conclusion and Perspective	119

Chapter 6 Sustainable Electrode Materials/Composites for Batteries and Fuel Cells for Achieving Supercapacitance and Environmentally Benign Mobility 134

Naveen Kumar, Surinder Singh, Neena Mehta, Alex Ibhaddon, and S.K. Mehta

6.1	Introduction	135
6.1.1	Advances in Electrode Materials of Batteries and Fuel Cells.....	136
6.1.2	Electrical Double Layer Capacitors	137
6.1.3	Pseudocapacitors	137

6.2	Electrode Material	138
6.3	Carbon-Based Material	139
6.3.1	Biomass-Derived Materials	139
6.3.2	Graphene-Based Electrode Material	143
6.4	Transition Metal-Derived Electrode Materials	147
6.4.1	Synthetic Strategies	147
6.4.2	Transition Metal Oxide/Hydroxide-Based Electrode Materials	148
6.5	Conclusion	151

Chapter 7 Carbon-Based Heterostructures: A Circular Economy Energy Application towards Electrochemical Sensors 159

Ragu Sasikumar and Byungki Kim

7.1	Introduction	160
7.2	Electrochemical Techniques	162
7.3	Carbon-Based Heterostructures Properties and Application to Electrochemical Sensors	163
7.3.1	Graphene (GR)	164
7.3.2	Carbon Quantum Dots (CQDs)	166
7.3.3	Carbon Nanotubes (CNTs)	168
7.3.4	Graphitic Carbon Nitride (g-C ₃ N ₄)	171
7.4	Challenges and Future Perspectives	172
7.5	Conclusions	173
7.6	Acknowledgments	173

Chapter 8 Technologies for Conversion of Biomass to Valuable Chemicals and Fuels 177

Uplabdh Tyagi and Neeru Anand

8.1	Introduction	177
8.1.1	Potential of Bio-Based Products in Terms of Circular Economy	178
8.1.2	Transition in Circular Economy Based on Biomass- Derived Energy and Products Sustainability	181
8.2	Process Advancement and Technologies for Biomass Pretreatment	183
8.2.1	Physio-Chemical Conversion	183
8.2.2	Thermo-Chemical Conversion	187
8.3	Advancements in Biowaste Refining Process and Techniques for the Development of Bioenergy and Bioproducts	190
8.3.1	Anaerobic Digestion and Co-Digestion for the Generation of Bioenergy	191
8.3.2	Composting or Co-Composting Techniques	193

8.4	Implication and Challenges	193
8.5	Future Implications.....	196
8.6	Conclusion	197

Chapter 9 Microgrid Structure for Tapping Renewable Energy 202

*Manjeet Singh, Kulbir Singh, Surinder Singh,
Arashdeep Singh, and Harjot Gill*

9.1	Introduction	202
9.2	Microgrid Structure Selection	203
9.2.1	Microgrid.....	205
9.3	Components of Microgrid Structure	205
9.3.1	Control Methods of Microgrid Structures.....	207
9.3.2	Control Modes for Microgrid Operation in Grid-Connected Mode	207
9.3.3	Control Modes for Microgrid Operation in Islanded Mode	207
9.4	Concerns of Microgrid Structure	208
9.5	Standards for Microgrid Structures.....	209
9.6	Parameters in Microgrid Design	209
9.7	Guidelines for Distribution of Electricity in India	210
9.8	Cost of Renewable Energy.....	211
9.9	Proposed Microgrid Models.....	211
9.9.1	Microgrid Based on Low X/R Ratio	211
9.9.2	Microgrid Based on PV DG	213
9.9.3	Microgrid Based on Wind DG	213
9.9.4	Hybrid Microgrid Based on PV and Wind DGs	214
9.10	Microgrid Behavior Characteristics	217
9.10.1	Voltage and Current Characteristics—Grid- Connected Mode	218
9.10.2	Voltage and Current Characteristics—Islanded Mode.....	221
9.10.3	Voltage and Current Characteristics—Utility Side Grid and Islanded Mode.....	224
9.10.4	Frequency at PCC.....	228
9.11	Conclusions.....	230

Chapter 10 Plastic Waste to Value-Added Products via Recycling and Upcycling..... 233

Navneet Kaur Bhullar and Ashok Prabhakar

10.1	Introduction	233
10.1.1	Plastic Pollution Overview	233
10.1.2	Importance of Circular Economy for Plastics.....	236
10.2	Problem Statement.....	238

10.2.1	Plastic Pollution.....	238
10.2.2	Types of Plastic	240
10.3	Circular Economy for Plastics.....	250
10.3.1	Key Principles of the Circular Economy for Plastics.....	250
10.3.2	Benefits of the Circular Economy for Plastics	250
10.3.3	Challenges of Implementing the Circular Economy for Plastics.....	251
10.4	Chemical Recycling (Advanced Recycling or Feedstock Recycling).....	260
10.5	Associated Challenges and Future Perspectives	261
10.6	Conclusions.....	262

Chapter 11 Closing the Loop: Circular Economy for Food-Based Emulsions and Films for Energy Materials..... 269

Himanshi Bansal, Surinder Singh, Alex Ibhaddon, and S.K. Mehta

11.1	Introduction	269
11.2	Significance of Food-Based Films and Emulsions in Sustainable Energy and Food Systems.....	270
11.2.1	Emulsions: Definition, Classification, and Application	271
11.2.2	Films and Materials Used for Film Formation	272
11.2.3	Food-Based Emulsions and Films Characterization Techniques	274
11.3	Food-Based Emulsions for Energy Materials.....	276
11.3.1	Emulsions as Templates for Energy Material Synthesis.....	276
11.3.2	Emulsion-Templated Porous Materials.....	276
11.3.3	Nanostructured Emulsions for Energy Conversion and Storage.....	277
11.4	Food-Based Films for Sustainable Energy Applications.....	279
11.4.1	Edible and Biodegradable Films Applications for Encapsulation.....	279
11.4.2	Energy Approaches for the Development of Films and Emulsions	279
11.4.3	Food-Based Films as Protective Coatings for Energy Devices	281
11.5	Sustainability and Environmental Considerations in Food-Based Emulsions and Films.....	282
11.6	Future Perspectives and Challenges in Food-Based Emulsions, Films, and Energy Materials	282
11.7	Conclusion	283

Chapter 12 MOF-Based Nanocomposites for Energy Storage and Supercapacitor Applications..... 289

Rekha Gaba and Ramesh Kataria

12.1	Introduction	289
12.2	Classification of Supercapacitors.....	290
12.2.1	Electric Double-Layer Capacitors	290
12.2.2	Pseudocapacitor	291
12.2.3	Hybrid Supercapacitors	291
12.3	Structure of MOFs	292
12.3.1	Method of Synthesis of MOF	293
12.3.2	MOF-Derived Metal Oxide/Carbon Nanocomposites for Supercapacitors	295
12.3.3	MXene/MOF Composites	296
12.3.4	Redox Polymer Nanocomposites.....	298
12.4	MOF for the Circular Economy (Trash to Treasure)	299
12.4.1	Purification and Activation of MOF in the Interpretation of Circular Economy	300
12.5	Conclusions.....	301

Chapter 13 A Circular Economy Approach to Solar Energy..... 308

Ashok Prabhakar

13.1	Introduction	308
13.1.1	Solar Energy Demand, Production, and Waste Generation	308
13.1.2	Solar Waste Handling.....	309
13.2	Circular Economy Strategy	310
13.2.1	Various Perspectives of the Circular Economy	310
13.3	Pathways to Circular Economy via PV Making/Recycling	312
13.3.1	Material Strength and Recycling.....	312
13.3.2	Reutilization of Materials from Other Industries via Recycling	312
13.3.3	Use of Electricity from Renewable Energy Sources.....	313
13.3.4	Design of PV Module for Circular Economy.....	313
13.3.5	Sustainable Role of Purchase for Circular Economy.....	314
13.4	Key Aspects at End-of-Life Uses	315
13.4.1	Addressing EOL Issues for Circular Economy	317
13.4.2	Environmental and Social Benefit.....	319
13.5	Indian Perspective of Circular Economy in Solar Energy	319
13.5.1	Installed PV Capacity in India	319
13.5.2	Installed PV Capacity Projection for Targeted Expansion of RE.....	320
13.6	Conclusion	321

Chapter 14	Recycling within the Chemical Industry: The Circular Economy Approach—Industrial Perspectives	329
	<i>Brijnandan Singh Dehiya</i>	
14.1	Introduction	329
14.1.1	Key Principles of Circular Economy in Chemical Industries.....	333
14.2	Circular Economy in Chemical Production	335
14.3	Circular Economy in Chemical Product Design	337
14.4	Circular Economy in Chemical Waste Management	338
14.5	Challenges and Opportunities	339
14.6	Conclusions.....	341
Chapter 15	Future Perspectives of Global Circular Economy Transition and Comprehensive Cost Analysis	347
	<i>Surinder Singh, Himanshi Bansal, Surendra Kumar Sharma, Suresh Sundaramurthy and Sushil Kumar Kansal</i>	
15.1	Circular Economy Introduction.....	347
15.1.1	Principles of Circular Economy	349
15.2	Drivers of Circular Economy Transition	350
15.3	Long-Term Value Maximization Using Circular Economy	355
15.4	Comprehensive Cost Analysis in Circular Economy	356
15.5	Cost-Benefit Analysis of Circular Economy Transition	358
15.6	Future Trends and Prospects	358
15.6.1	ColdHubs: Solar-Powered, Cooling-as-a-Service Solution.....	358
15.6.2	Bangladesh's Award-Winning Hospital	359
15.6.3	Brazilian Cosmetics Brand Natura Flips the Script on Deforestation.....	359
15.6.4	Netherlands Became the Global Bicycle Capital	359
Index		365
